

Adding a list

As a user I should be able to create a list with a custom title. Number of created lists is not limited. Title length should not exceed 50 characters. Application should block possibility to enter more signs. After clicking 'add' button I should be able to see the list on the screen. The created list should appear on the screen as columns. The button that allows you to add a list should move to the next column in the right direction. In the top right corner of the list there should be a button that allows you to delete the list. There is no way to change the title of created list. Within the created list I should be able to create the tasks. It should not be possible to add two lists with the same name.

Add new list flow

Removing a list

As a user, I should be able to remove the list. If list contains the tasks, all tasks should be removed also.

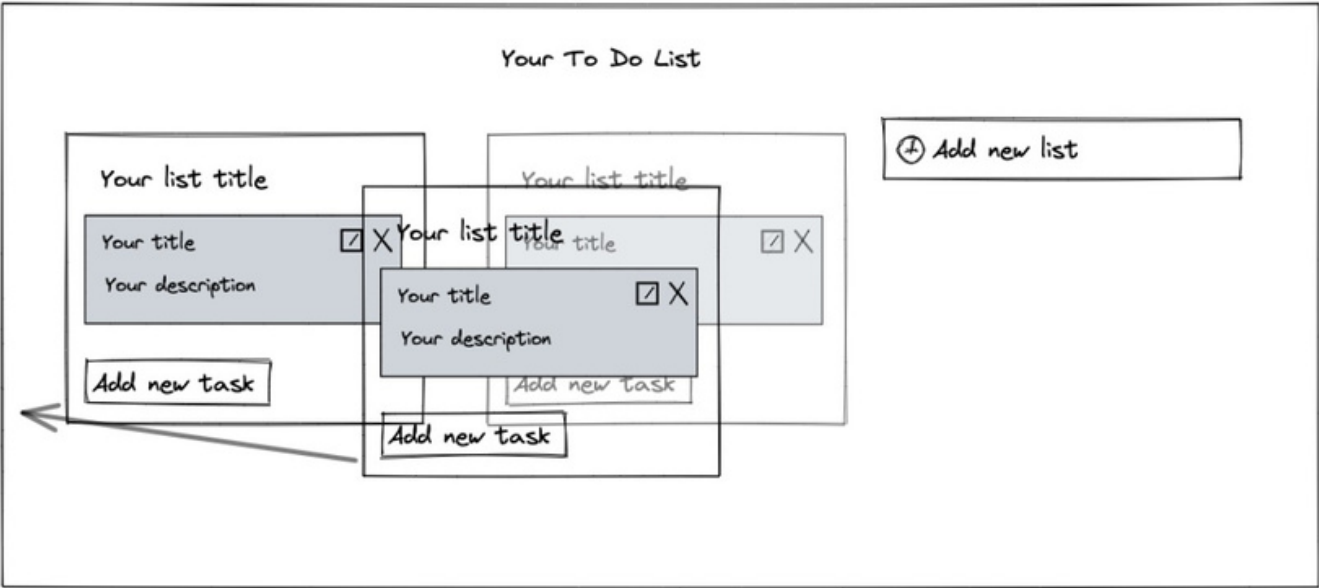

Remove a list

Changing lists order

As a user, I should be able to change lists order in columns.

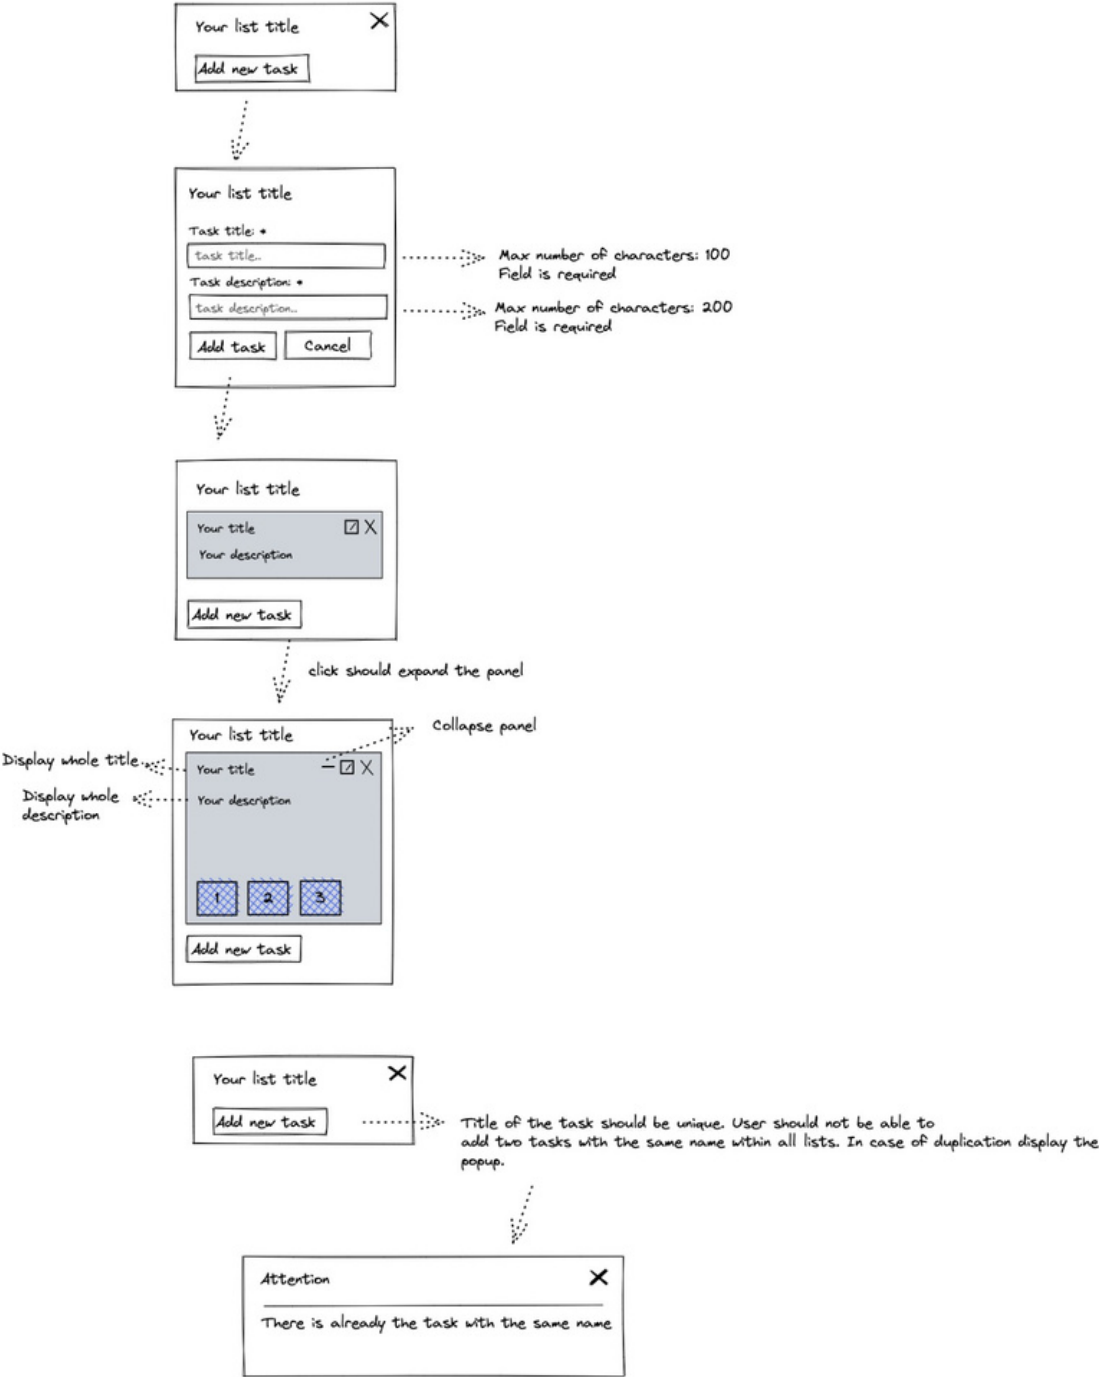

Change lists order

Adding new task

As a user, I should be able to add as many tasks to the list as I want. To create task I need to pass title and description. Both fields are required. Title input field should be limited to 100 characters. Description input field should be limited to 200 characters. After clicking 'Add task' button, I should see new task added to the list. It should not be possible to add two tasks with the same name.

Add new task to the list

Removing a task

As a user, I should be able to remove the task.

Remove a task

Updating the task

As a user, I should be able update the task title and task description.

Modify task

Moving the tasks between lists

As a user, I should be able to re-assign the task to another list using drag-and-drop solution. Moving tasks should work in all directions -> left to right and right to left.

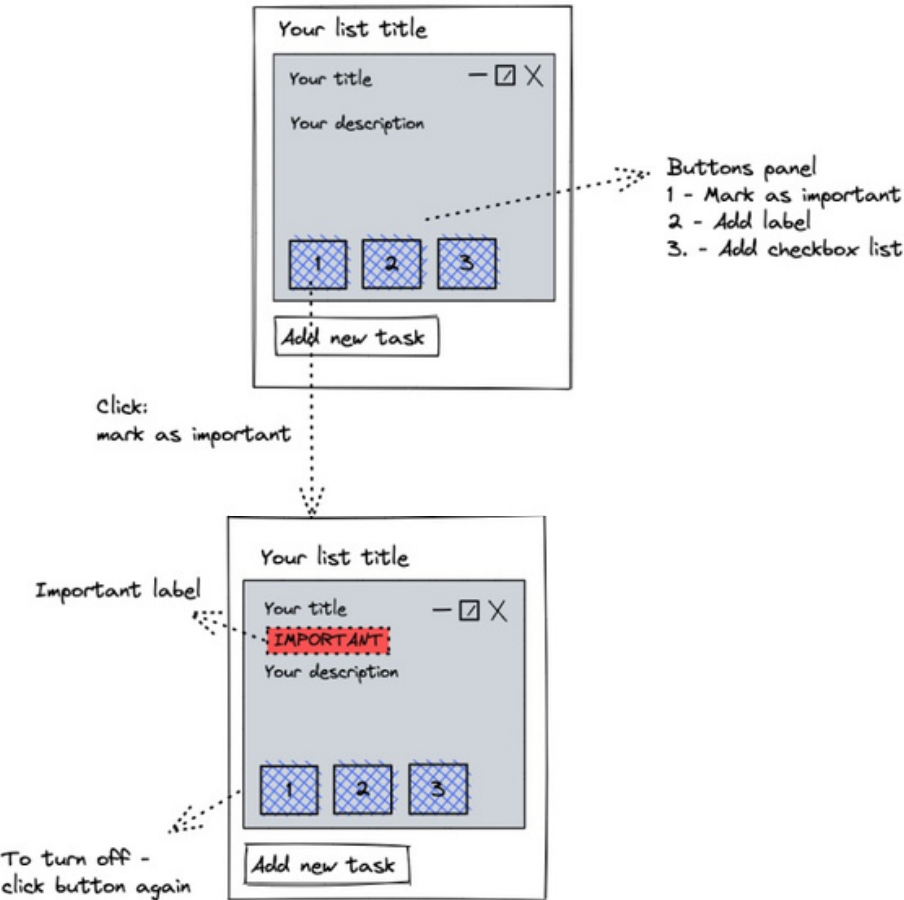

Re-assigning the task

Mark task as important

As a user, I should be able to mark a task with an 'important' flag. When clicking the second time, flag should be removed from the task.

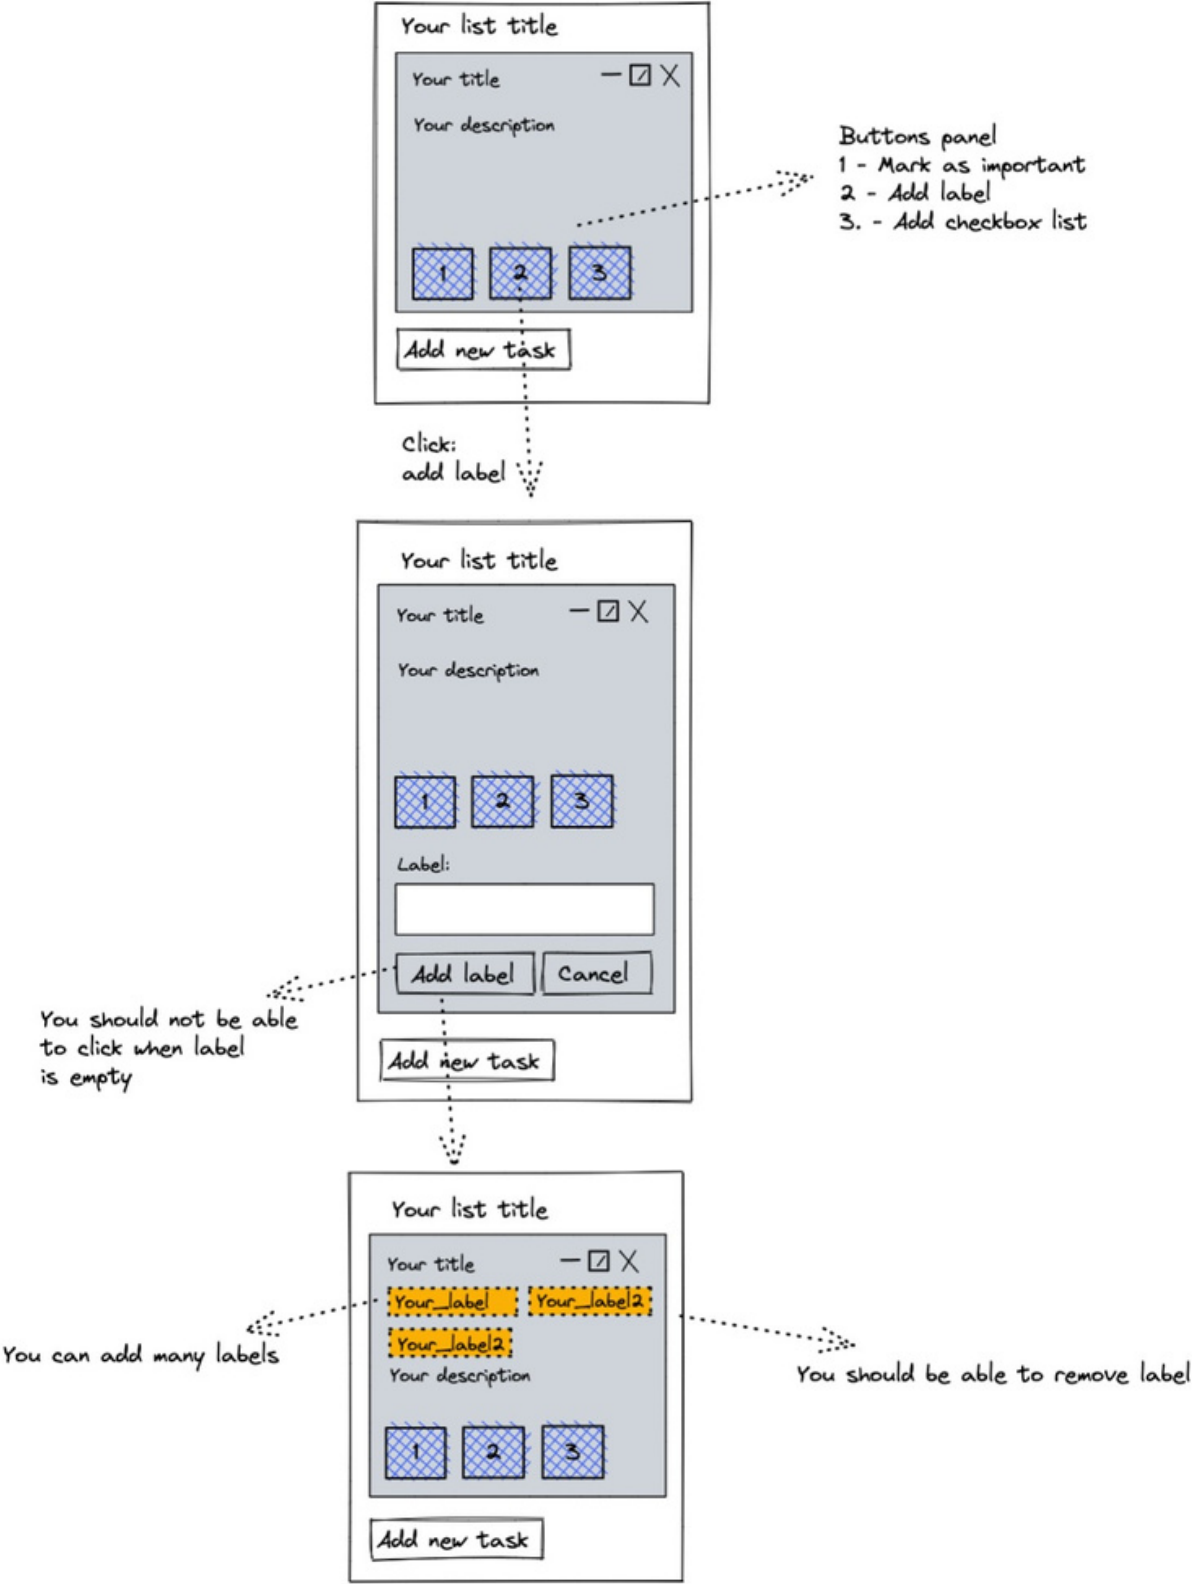

Mark as important

Add labels to a task

As a user, I should be able to add as many labels to the task as I want. I should be able to configure label name and remove label.

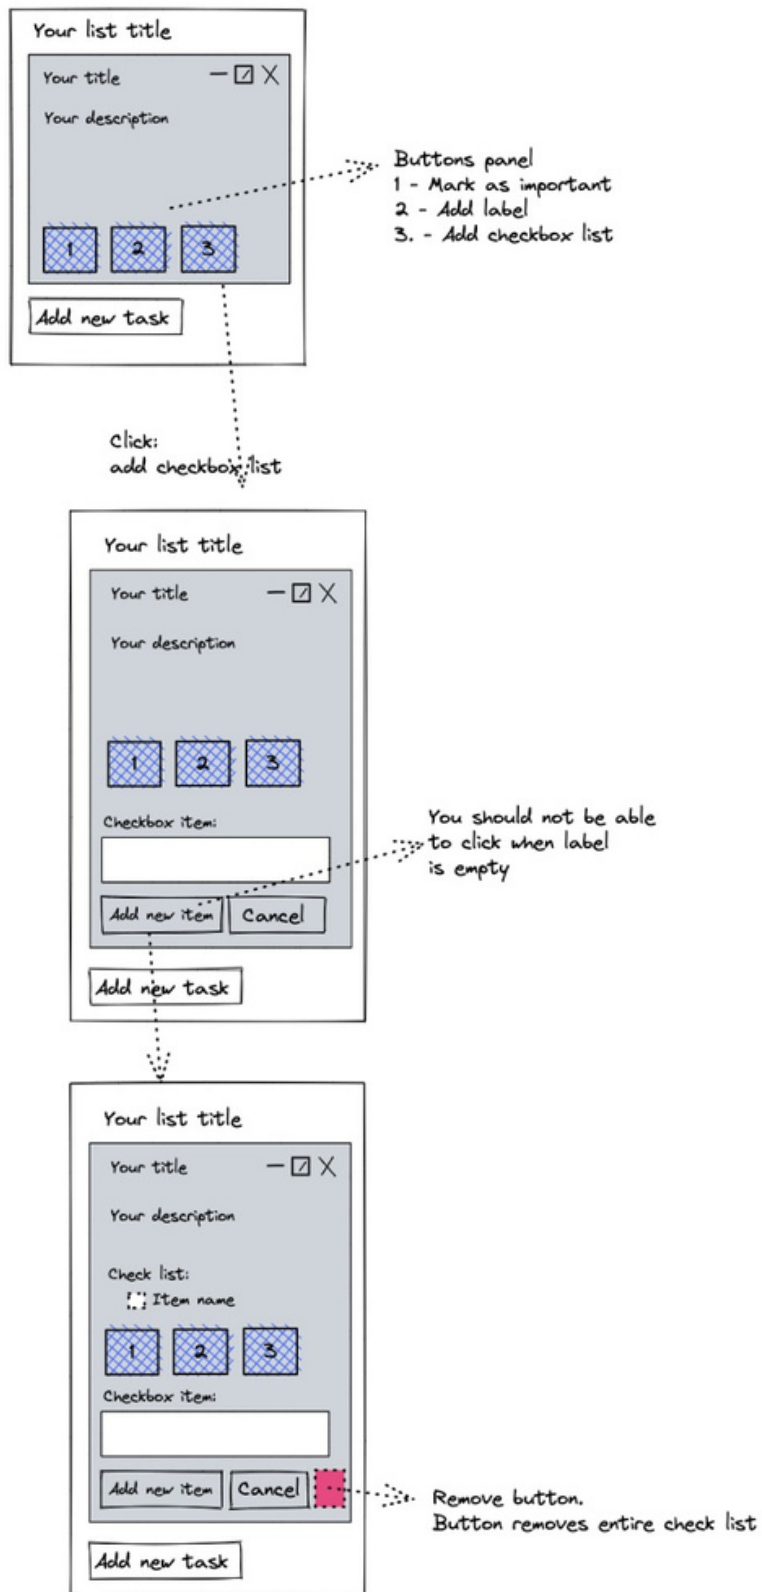

Add labels

Add checkbox list to a task

As a user, I should be able to add checkbox list to the task and configure each checkbox name. Additionally, I should be able to remove entire list.

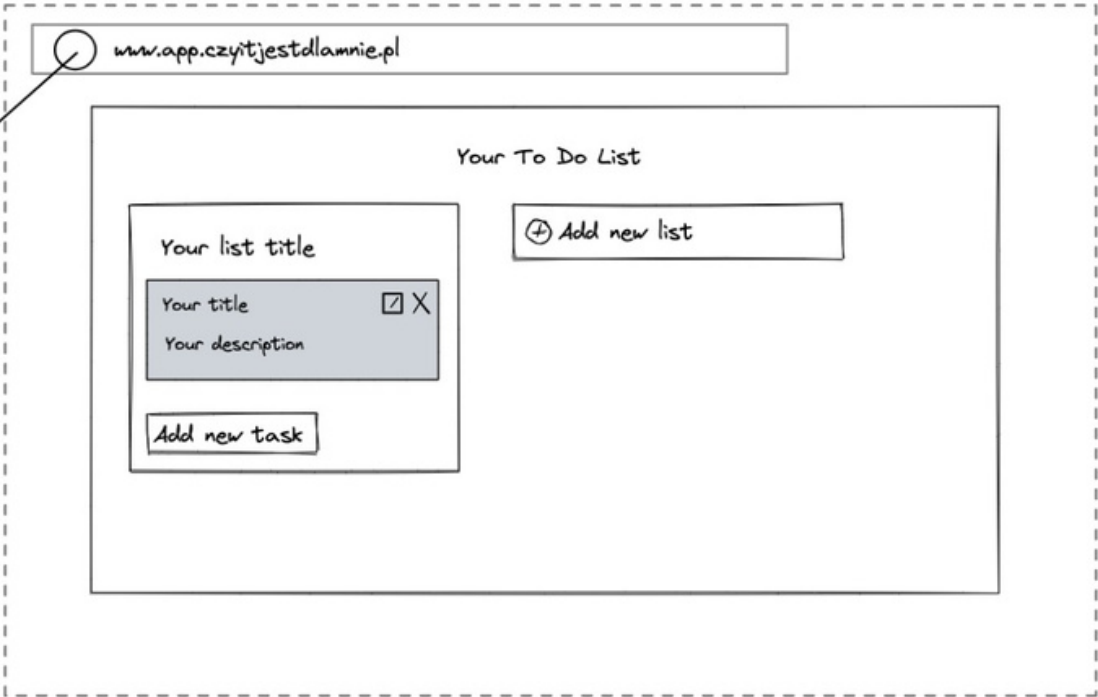

Add checkbox list

Data persistence

As a user I should not lose my lists and my tasks after refreshing a web browser (F5)

Persistent state

After page reload (F5)
user should not loose
the lists and tasks
